KINGSWOOD COMPUTING

Managing 21st-Century-style with the Kingswood Billing App.

The Kingswood Billing App is being used by hundreds of farm contractors, both in standalone mode and in conjunction with Kingswood's Full Contractor Accounts offering. Apart from its core functions of recording job and payment details, checking customer balances, and generating invoices and statements, the Billing App has many other useful facilities. Here are some of them:

Key Business Indicators

Ever wondered how much revenue you've generated this year? Or how much money you've outstanding at this point in time? Or how many jobs you've completed but not yet billed out? The answers are all there under the Key Indicators button.

Summary & Detailed Reports

Ever thought it'd be nice at the touch of a button to compare this year's performance with last year's for each of your products and/or services? Or to check a monthly breakdown of turnover? It's all there under Summary Reports. Your accountant will also be impressed with a detailed listing of invoices issued and payments received. He might even be persuaded to offer a fee discount for all the time it saves him! Check out Transaction Reports.

Geo Locator

Want the Billing App to record time and place, start and finish of each job automatically? Get Kingswood to turn on the Geo Locator function. The App can also be used to record check-in and check-out times for operators.

Job Scheduler

During the busy season, it can be tricky keeping track of planned jobs – particularly for larger operations with a number of operators. To avoid double-booking or unnecessary downtime, the Job Scheduler allows you to allocate jobs to particular operators days or weeks in advance. The operator can see his allocated jobs on his phone and as he completes them, they're recorded as done.

Hard At Work In Kinnegad

David Cooney from Peter Cooney & Sons, a Kinnegad-based contractor, has been using the Kingswood Billing App in recent months.

His verdict: "Kingswood has come up with a 21st-century solution to age-old problems in the farm contracting business."
